THOMAS E. "TIM" HUTCHINS
SECRETARY

June 10, 2005

**The Honorable Robert L. Ehrlich, Jr.
Governor
State House
Annapolis MD 21401**

Dear Governor Ehrlich:

In accordance with Public Safety Article 2, Subsection 307 and 308, of the Annotated Code of Maryland, the Maryland State Police is pleased to submit the 2004 Uniform Crime Report, Crime in Maryland. This publication represents the 30th annual report.

Maryland law enforcement agencies contribute crime data to the Maryland State Police Uniform Crime Reporting Program. The crime data, submitted monthly to the Central Records Division, is carefully validated, and every effort is made to authenticate the accuracy and completeness of the reported data.

The 2004 Crime in Maryland publication provides valuable information to law enforcement personnel, members of State government and interested parties, including; academic, civic and research organizations. The information is beneficial in assessing crime patterns and develop effective strategies to combat criminal acts.

These crime statistics could not have been accurately compiled without the dedication and cooperation of all police agencies, sheriff offices and other specialized police agencies throughout Maryland. The contributions of those agencies who provide statistical data to the Uniform Crime Reporting Program permit the Maryland State Police to develop a comprehensive picture of crime in Maryland.

Sincerely,

**Thomas E. Hutchins
Superintendent**

TEH:IJW:kj

"Maryland's Finest"

Executive Summary

An annual release since 1975, Crime In Maryland pertains to crime statistics. This publication details crime (State, County, Municipality and by reporting agency), clearance rates, arrests, law enforcement officers killed or assaulted and law enforcement employee data. The statewide Uniform Crime Reporting Program was initiated to report crime in Maryland to the National UCR program administered by the Federal Bureau of Investigation. The Maryland program has since increased its data collection with domestic violence, hate bias reporting and carjacking statistics. Carjacking and hate bias incident statistics are released in separate publications to facilitate detailed reporting.

The Uniform Crime Reporting Program collects information on crimes that were selected as an index to represent crime in the United States. These index crimes are murder, rape, robbery, aggravated assault, breaking or entering, larceny-theft and motor vehicle theft. Although not an indexed crime, the crime of arson is also collected.

There were 241,263 total crime incidents reported in 2004 representing a 3 percent decrease when compared to 2003 crime totals. Violent crime consisting of murder, rape, robbery and aggravated assault increased less than 1 percent. The property crimes of breaking or entering, larceny-theft and motor vehicle theft experienced a 3 percent decrease. The index crime breakdown is as follows:

Murder	- .8%	Breaking or Entering	- 5.1%
Rape	- 3.1%	Larceny-Theft	- 3.4%
Robbery	- 4.1%	Motor Vehicle Theft	- 1.5%
Aggravated Assault	3.2%	Arson	10.8%

Total arrests for 2004 were 309,777 representing a 5 percent decrease when compared to the total arrests for 2003. Of the total arrests 257,546 were adults, a decrease of 6 percent while 52,231 were juvenile arrests an increase of 2 percent. Of the total arrests there were 51,971 persons arrested for drug abuse violations, a decrease of 5 percent. There were 23,625 persons arrested for driving while intoxicated, an increase of less than 1 percent.

Three law enforcement officers died in the line of duty during 2004. There were 3,868 officers assaulted which reflected an increase of 3 percent. This assault figure represents 26 percent of full time law enforcement officers employed.

In 2004, there were 14,897 full time law enforcement officers employed which represents a less than 1 percent increase. There were 2.7 full time law enforcement officers per 1,000 population.

INTRODUCTION

BACKGROUND

The Maryland Uniform Crime Reporting (UCR) Program is one measure that has been taken in the establishment of an effective Criminal Justice Information System (CJIS) for the State. This particular phase focuses on the incidence of crime and law enforcement. It establishes a method to collect, evaluate and process uniform statistical data on crime statewide. The Maryland UCR Program provides the means to forward more valid data to the Federal Bureau of Investigation from a single agency and also to consolidate it into an annual report entitled Crime in Maryland.

NATIONAL UNIFORM CRIME REPORTING PROGRAM

The counterpart of the Maryland UCR Program is the National UCR Program which is under the direction of the Federal Bureau of Investigation. The National Program resulted from a need for a uniform compilation of crime statistics nationwide. Uniform Crime Reports were first collected in 1930 after being developed by a committee of the International Association of Chiefs of Police. The IACP continues to serve in an advisory capacity to the FBI in the current operation of the Program.

Crime statistics voluntarily submitted by individual law enforcement agencies from all fifty states are presented annually in the FBI's publication entitled Crime in the United States.

MARYLAND UNIFORM CRIME REPORTING PROGRAM

The FBI has actively assisted individual states in the development of State UCR Programs compatible with the National Program. Maryland took advantage of this assistance in 1972 and was able to develop its own program by 1975.

The Maryland Uniform Crime Reporting Program became operational January 1, 1975. This program consists of the uniform classification, review, compilation and analysis of crime statistics reported by all law enforcement agencies of the State pursuant to the guidelines and regulations prescribed by law.

The responsibility and authority for the collection and dissemination of UCR data is assigned to the Department of State Police in accordance with Public Safety Article 2, subsection 307 and 308 of the Annotated Code of Maryland.

PURPOSE AND OBJECTIVES

In keeping with the recommendation of the President's Commission on Law Enforcement and the Administration of Justice, the Maryland UCR Program was planned for eventual growth into a complete and integrated offender based Criminal Justice Information System. Under this program, each offender arrested in Maryland is tracked through the entire criminal justice system from time of arrest, through the courts, to the correctional system where their exit (parole, expiration of sentence, etc.) will be recorded. In this manner, a complete "criminal history" on individual offenders will be available for use by the police, courts and correctional agencies in Maryland. In addition, statistical data derived from the CJIS Program will provide assistance in determining the overall efficiency of the Criminal Justice System in Maryland and will make effective management studies possible.

The fundamental objectives of the Maryland UCR Program are:

1. Inform the Governor, legislature, other governmental officials and the public as to the nature, magnitude and trends of the crime problem in Maryland.
2. Provide law enforcement administrators with criminal statistics for administrative and operational use.
3. Determine who commits crimes by age, sex, race and other attributes in order to find the proper focus for crime prevention and enforcement.
4. Provide base data and statistics to measure the workload and effectiveness of Maryland's Criminal Justice System.
5. Provide base data and statistics to measure the effects of prevention and deterrence programs.
6. Provide base data and statistics for research to improve the efficiency, effectiveness and performance of criminal justice agencies.
7. Provide base data to assist in the assessment of social and other causes of crime for the development of theories of criminal behavior.
8. Provide the FBI with complete UCR data to be included in the national crime reports.

REPORTING PROCEDURES

Under the Maryland UCR Program, law enforcement agencies submit specified Uniform Crime Reports. The necessary information for each of the required reports is gathered from each agencies record of complaints, investigations and arrests.

Crime data and information is submitted by state, county and municipal law enforcement agencies monthly on the number of offenses known to them in the following crime categories:

- (1) Criminal Homicide
- (2) Forcible Rape
- (3) Robbery
- (4) Assault
- (5) Breaking or Entering
- (6) Larceny-theft
- (7) Motor Vehicle Theft
- (8) Arson*

The count of offenses is taken from the record of complaints received by law enforcement agencies. This information comes from victims, witnesses, other sources or discovered by law enforcement during their own operation. Complaints determined by subsequent investigation to be unfounded are eliminated from count. The resulting number of "actual offenses known to law enforcement agencies" in these crime categories are reported without regard for whether anyone is arrested, stolen property is recovered, local prosecutive policy or any other consideration.

Reported offenses are recorded by the municipality and county in which they occur. Municipal law enforcement agencies report those crimes which occur within the cities and state. County agencies report those crimes which occur in the counties outside the cities.

A supplemental report is also submitted each month showing the value of stolen and recovered property, the type of property and the type of offense within a crime category in which it was taken. This report also shows the number of stolen vehicles recovered locally and by other jurisdictions. In addition, each agency reports the number of persons arrested by them or other agencies for crimes which have occurred within their jurisdiction. The arrest report also shows the age, sex and race of those arrested and the disposition of juveniles by the arresting agency. When applicable, supplemental reports are submitted regarding the persons, weapons and circumstances, etc., involved in homicides, domestic violence incidents, officer assaults and "carjackings". In addition, police employee data is collected on an annual basis.

*Monthly arson reports are submitted for law enforcement agencies by the State Fire Marshal's Office and designated county agencies.

VERIFICATION PROCESS

A major concern in the collection of crime statistics for law enforcement agencies throughout the state is the uniformity and accuracy of data received. Program aides such as guides and instructional classes do not necessarily guarantee the accuracy of the reports submitted by the contributors, therefore, additional controls are necessary.

Each report received by the UCR section is recorded, examined and verified for mathematical accuracy and possibly more important for reasonableness. The verification process includes numerous checks to ensure the validity of information. The elimination of duplicate reporting by individual contributors receives particular attention. Minor errors are corrected by telephone contact with the contributors. Substantial variations and errors are adjusted through personal contacts. The personal contacts are invaluable to the accuracy and quality of reporting. Field Records Representatives are engaged in a constant educational effort and as such, provide a vital link between the UCR Program and the contributor.

POPULATION DATA

The computation of crime rates as they appear in this report by municipality, county and state are based on the latest available population estimates for the year. These population estimates are provided by the Federal Bureau of Investigation through the cooperation and assistance of the United States Bureau of Census.

LIMITATIONS OF A UNIFORM CRIME REPORTING PROGRAM

Information currently collected by the Maryland Program is generally the same as that gathered by the National System and the methods of classifying and scoring offenses and arrests are the same. This readily enables comparisons with other states and with the nation, as a whole. However, there are limitations to the information collected which should be clearly understood before any conclusions are drawn from the UCR data presented in this report.

The main goal of the UCR Program is to furnish police administrators with a measure of their activities and operational problems as indicated by the number of reported offenses, arrests, clearances, etc.

A first step in the control of crime is to ascertain the true dimensions of the problem. However, present statistics as gathered by the UCR Program measure neither the real incidence of crime or the full amount of economic loss to victims. Information regarding number of offenses, clearances, value and type of property stolen and recovered property are collected only for the eight Part I offenses. For Part II offenses the only information submitted is the number of arrests for these crimes. Consequently, there is no record of the

actual number of these offenses occurring, or is there a calculation made for property loss.

The Crime Index does not explicitly take into account the varying degrees of seriousness of its seven components (excluding arson). Each crime receives the same weight as it is added to the index, consequently, an auto theft is counted the same as a murder and an aggravated assault is weighed equally with an attempted breaking or entering. Any review of crime must consider the volume, rate and trend of each offense that comprises the index and the relationship between these seven crimes*.

The Maryland and National Uniform Crime Reporting Programs are designed to measure offenses committed and persons arrested. Difficulties can arise if this distinction is not kept clearly in mind. Crimes relate to events, arrests relate to persons. Unlike traffic violations where there is usually one event, violation and offender, a single criminal act can involve several crimes, offenders and victims. Relating specific crimes to a criminal or offense to evaluate characteristics of those arrested, is generally beyond the scope of the present Uniform Crime Reporting System.

Juvenile crime and arrest statistics, because of their nature, are another area of misunderstanding. Many juvenile offenders are handled informally, as a consequence, inaccurate or incomplete recording of the event or action may result. Procedures for handling juveniles vary between departments more so than the handling of adult offenders. Furthermore, the degree of juvenile involvement in cleared offenses is probably seriously misunderstood because the juvenile clearance indicator is recorded only when juveniles are exclusively involved. When both adults and juveniles are subjects in a clearance, the juvenile participation is not reported.

The preceding comments should not be viewed as an indictment of the Uniform Crime Reporting Program which, admittedly, is designed for the operational requirements of law enforcement agencies. While the current method of gathering and reporting crime and arrest data provide a less than complete picture of criminality in our society, the FBI has designed the National Incident Based Reporting System to address these limitations.

*Arson is not used at this time in computing the Crime Index.

CRIME FACTORS

Statistics compiled under the Uniform Crime Reporting Program from data submitted by Maryland law enforcement agencies projects a statewide view of crime. Awareness of the presence of certain crime factors which may influence the resulting volume and type of statistics presented is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present to some degree in every community. Their presence affects in varying degrees the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern. The police are limited in their role to its suppression and detection. As stated by the President's Commission on Law Enforcement and Administration of Criminal Justice in their report "The Challenge of Crime in a Free Society" (1967 - Page 92):

"But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the criminal justice system; the criminal justice system is only one part of the government; and the government is only one part of society. In so far as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time."

Listed below are some of the conditions which affect the type and volume of crime that occurs from place to place:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with particular reference to age, sex and race.

Economic status of the population.

Relative stability of the population including number and ratio of seasonal visitors/residents, commuters and other transients.

Climate and seasonal weather conditions.

Educational, recreational and religious characteristics.

Standards governing appointments to the police force.

Policies of the prosecuting officials and the courts.

Attitude of the public toward law enforcement problems.

The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

Organization and cooperation of adjoining and overlapping police jurisdictions.

CRIME INDEX OFFENSES

The crime counts listed in this publication are actual offenses established by police investigation. When police receive a complaint of a crime and the follow-up investigation discloses no crime occurred, it is "unfounded". In 2004, police investigations that were "unfounded" represented 3 percent of the complaints concerning index offenses, ranging from less than 1 percent in the aggravated assault category to 19 percent in the rape category. When compared to 2003, there was less than 1 percent "unfounded" in the aggravated assault category and 15 percent in the rape category.

A total of 241,263 actual Index Offenses were reported to law enforcement agencies in Maryland during the calendar year 2004. This represents a decrease of 3 percent when compared to the 2003 total of 248,194 Crime Index Offenses.

An analysis of Index Offenses by month in 2004 shows that August had the highest frequency of occurrence and February had the lowest. In 2003, October had the highest frequency and February the lowest.

The Crime Index Offenses represent the most common problem to law enforcement. They are serious crimes by their nature, volume, or frequency of occurrence. They are categorized as Violent Crimes, which includes Murder, Forcible Rape, Robbery and Aggravated Assault, or as Property Crimes which includes Breaking or Entering, Larceny-Theft and Motor Vehicle Theft.

VIOLENT CRIME

Violent Crimes involve the element of personal confrontation between the perpetrator and the victim; consequently, they are considered more serious than Property Crimes because of their very nature. These offenses accounted for 16 percent of the total Crime Index for 2004, the same as in 2003. Violent Crime increased less than 1 percent compared to 2003.

Analyzing the Violent Crimes by month reveals May had the greatest frequency of occurrence, while February had the lowest. In 2003 October had the greatest frequency of occurrence, while December had the lowest.

PROPERTY CRIMES

The number of Property Crimes reported during 2004, was more than 5 times greater than the number of Violent Crimes reported. As a group, Property Crimes made up 84 percent of the total Crime Index in 2004, the same as 2003. Property Crime decreased 3 percent compared to 2003. A monthly analysis showed August had the highest frequency of occurrence and February the lowest. In 2003, October had the highest frequency of occurrence while February had the lowest.

RATES

Crime Rates relate the incidence of crime to the resident population. Many other factors which may contribute to the volume and type of crime in a given jurisdiction are not incorporated here, but are shown in the section entitled "Crime Factors".

In 2004, the Crime Rate for Maryland was 4,340.8 victims for every 100,000 population. This represents a 4 percent decrease in the Crime Rate when compared to the 2003 rate of 4,505.3.

The 2004 Crime Rate for the Violent Crime group was 700.6 victims per 100,000 inhabitants, a less than 1 percent decrease compared with the 2003 rate of 703.9. The Property Crime group had a rate of 3,640.2 victims, a 4 percent decrease when compared to the 2003 rate of 3,801.4.

CLEARANCES

For Uniform Crime Reporting purposes, a crime is cleared when police have identified the offender, have evidence to charge him and actually take him into custody. Solutions of crimes are also recorded in exceptional instances where some element beyond police control precludes formal charges against the offender, such as the victim's refusal to prosecute or local prosecution is declined because the subject is being prosecuted elsewhere for a crime committed in another jurisdiction. The arrest of one person can clear several crimes or several persons may be arrested in the process of solving one crime.

Maryland Law Enforcement Agencies cleared 22 percent of all Index Offenses reported to them in 2004, the same as in 2003.

The Violent Crimes recorded a 50 percent clearance rate in 2004, compared to a 51 percent clearance rate in 2003. The Property Crime group experienced a 17 percent clearance rate in 2004, the same as in 2003.

Considered individually the 2004 Violent Crime clearance rate was determined to be 54 percent of the Murders, 55 percent of the Rapes, 26 percent of the Robberies and 62 percent of the Aggravated Assaults. The Property Crime clearance rates were 17 percent for Breaking or Entering, 20 percent for Larceny-Theft and 9 percent for Motor Vehicle Theft.

The relatively high clearance rate for Violent Crimes as compared to Non-Violent Property Crimes is in part attributable to the volume difference between the two. Property Crime volume is much greater than that of Violent Crime and police investigation of Violent Crime is usually more intense. While the element of direct contact between the victim and perpetrator, as well as witness identification also contributes to this higher rate of solution for Violent Crime, stealth is involved to a greater degree in the Property Crime.

JUVENILE CLEARANCES

A juvenile clearance is the clearance of an offense in which all of the offenders involved were under the age of 18. If even one of the offenders was over 17 years of age, the clearance of that offense is not considered a juvenile clearance. In 2004, such juvenile clearances represented 20 percent of all clearances, the same as in 2003.

Juvenile clearances in the Violent Crime category represented 16 percent of the total cleared in 2004, the same as in 2003. The clearances in Violent Crimes are; Homicide 4 percent, Rape 9 percent, Robbery 21 percent and Aggravated Assault 15 percent.

In the Property Crime category, clearances involving Juvenile offenders represented 23 percent of the total cases cleared in 2004, the same as in 2003. The clearances in Property crimes are; Burglary 21 percent, Larceny-Theft 22 percent and Motor Vehicle Theft 30 percent.

STOLEN PROPERTY VALUE

The total value of Property Stolen during 2004 was \$349,285,014 which represents a 9 percent decrease from 2003. Recovered Property amounted to \$161,780,429 which is 46 percent of the total stolen, resulting in a \$187,504,585 property loss to victims in the State of Maryland during 2004. This property loss represents a 15 percent decrease when compared to the property loss in 2003.

5 YEAR TREND

	5 YEAR AVERAGE	2004	2003	2002	2001	2000
Stolen	345	349	383	357	336	299
Recovered	150	162	162	164	144	118

Value in Millions

MURDER

MURDER

Murder and non-negligent manslaughter is the willful (non-negligent) killing of one human being by another.

VOLUME AND RATE

During 2004, a total of 521 murders were reported, this represents an .8 percent decrease over 2003. Murder accounted for 1 percent of all violent crime and .2 percent of the crime index. In 2004, there were 9.4 murders per 100,000 population.

ANALYSIS OF MURDER

In 2004, 279 murders were cleared with 4 percent of these clearances involving only juvenile offenders. A total of 293 persons were arrested for murder during 2004. A breakdown of persons arrested for murder was 89 percent male, 11 percent female, 10 percent juvenile, 76 percent black, 23 percent white and 1 percent consisting of American Indian and Asian.

During 2004, 350 of the murder victims were in the 20 to 45 age group representing 67 percent of the total.

Handguns were used in 70 percent of the reported murders in 2004. This represents a 6 percent increase in their use when compared to the handgun use in 2003.

The next most used weapon was a knife accounting for 11 percent of the reported murders in 2004. This represents a 23 percent decrease when compared to 2003.

Drug related murders accounted for 1 percent of the total, as compared to 6 percent in 2003.

Family members as offenders in murder accounted for 11 percent while boyfriend or girlfriend (those not cohabitating) reflects 1 percent of the total reported. There was a 10 percent increase in family related murders while boyfriend or girlfriend murders decreased 44 percent. Additionally, an acquaintance is listed in 14 percent of the murders reported in 2004. Strangers and unknown relationships accounted for two other large categories, 10 percent and 80 percent respectively.

In 53 percent of the murders, the offenders are unknown and not described. When the race of the victim and offender is known the offender is most often someone of the same race.

VICTIM, DESCRIBED OFFENDER RACE RELATIONS

VICTIM	TOTAL MURDERS	DESCRIBED OFFENDER	SAME RACE OFFENDER	PERCENT DISTRIBUTION

ROBBERY

ROBBERY

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

VOLUME AND RATES

During 2004, there were 12,761 robbery offenses reported, this represents a 4 percent decrease over 2003. Robbery accounted for 33 percent of the violent crime and 5 percent of the crime index. In 2004, there were 229.6 robberies per 100,000 population.

ANALYSIS OF ROBBERY

During 2004, 49 percent of the robberies were committed on the street, while only 2 percent were bank robberies. Of the total number of robberies committed, firearm accounted for 49 percent while robberies committed with no weapon accounted for 34 percent of the total.

In 2004, 3,267 robberies were cleared with 21 percent of these clearances involving only juvenile offenders.

A total of 3,431 persons were arrested for robbery during 2004. A breakdown of persons arrested for robbery was 93 percent male, 7 percent female, 34 percent juvenile, 74 percent black, 25 percent white and less than 1 percent consisting of American Indian and Asian.

ARSON

ARSON

Arson is any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

VOLUME AND RATE

During 2004, there were 2,378 arsons reported, this represents a 11 percent increase over 2003. In 2004, there were 42.8 arsons per 100,000 population. Structures accounted for 41 percent, mobile accounted for 39 percent of the total number of arsons while other property accounted for 20 percent. Residential comprised 50 percent of the structures at which arson was directed, with 12 percent of all targeted structural property being uninhabited. The estimated value of property damage was approximately 17 million dollars.

In 2004, 381 arsons were cleared with 57 percent of these clearances involving only juvenile offenders.

A total of 725 persons were arrested for arson during 2004. A breakdown of persons arrested for arson was 82 percent male, 18 percent female, 62 percent juvenile, 46 percent black, 52 percent white and 1 percent consisting of American Indian and Asian.

DOMESTIC VIOLENCE

DOMESTIC VIOLENCE

The Domestic Violence Act of 1994 mandated that all law enforcement agencies in Maryland submit copies of their police reports of incidences involving domestic violence to the Maryland State Police. Through the Maryland Uniform Crime Reporting Program, a revised Battered Spouse data collection form was created. This new form allowed for the collection of more data, which is based upon a revised definition of a domestic violence incident under the guidelines of the Maryland Uniform Crime Reporting Program.

Under the Maryland Uniform Crime Reporting Program the definition for a domestic violence incident is considered ***"An individual who has received deliberate physical injury or is in fear of imminent deliberate physical injury from a current or former spouse or a current or former cohabitant. This includes a homosexual relationship."*** In addition, a domestic violence incident in the Maryland Uniform Crime Reporting Program is considered to be any **crime** against:

- ***A married person living with their spouse.***
- ***A married person estranged from their spouse.***
- ***A male and female in an intimate relationship who are not married to each other and who are cohabiting or had cohabited.***
- ***Individuals of the same sex in an intimate relationship who are cohabiting or had cohabited.***

It should be noted that prior to 1996 the statistical information collected was only on assaults to domestic partner and did not include same sex in an intimate relationship who are cohabiting or had cohabited. The following information gives a more comprehensive report that includes statistics based on the revised definition of domestic violence including all crimes.

DOMESTIC VIOLENCE CRIMES

There are limitations to the information collected which should be clearly understood before any conclusions are drawn from the data presented in this report. Procedures for handling domestic violence crimes vary between law enforcement agencies and counties of occurrence.

The current method of collecting domestic violence information for this report provides less than a complete picture. There is at present, no other statewide informational system in general use gathering these statistics from law enforcement agencies that will more accurately perform this task.

The Baltimore Police Department was unable to provide any 2002 or 2003 Domestic Violence Statistics to the Maryland Uniform Crime Reporting Program due to data conversion. Therefore, there was a total of 23,013 domestic violence crimes reported in 2004 as compared to 17,860 crimes in 2003, resulting in a 29 percent increase. The breakdown is as follows:

Crime	2000	2001	*2002	*2003	2004
Homicide	26	22	22	15	28
Rape	59	62	55	58	67

* Baltimore Police Department was unable to provide any 2002 and 2003 Domestic Violence statistics to the Maryland Uniform Crime Reporting Program due to data conversion.

ASSAULTS

Assault is the most frequent domestic violence incident reported. During 2004, there were 21,365 domestic assaults, representing a 28 percent increase over 2003 domestic violence assaults. There were 5,518 domestic assaults reported as aggravated. Aggravated assaults were 26 percent of the total reported domestic assaults in 2004.

Analysis

In 2004, 44 percent of all domestic violent crimes occurred between the hours of 7:00 P.M. to 1:00 A.M., inclusive. Thirty-five percent of domestic violent crimes occurred during Saturday and Sunday. When combining these two categories this would indicate that an intensive period for domestic violent crimes occur between 7:00 P.M. and 1:00 A.M. on Saturday and Sunday.

* Baltimore Police Department was unable to provide any 2002 and 2003 Domestic Violence statistics to the Maryland Uniform Crime Reporting Program due to data conversion.

Total	20,928	20,688	18,904	17,860	23,013

CLEARANCES

There are two ways of clearing a case. One is by making an arrest and charging the person(s) with the offense. The second is known as an exceptional clearance. Exceptional clearance means the police know the identity and location of the person(s) who committed the offense and have enough information to arrest them. However, there is some reason beyond their control that prevents them from making the arrest.

The arrest and exceptional clearances reported reflect the disposition at the time the domestic violence report form was forwarded to the Uniform Crime Reporting Program. These reports are not updated, therefore, other arrests and exceptional clearances may occur but would not be reflected in the following totals.

* Baltimore Police Department was unable to provide any 2002 and 2003 Domestic Violence statistics to the Maryland Uniform Crime Reporting Program due to data conversion.

	2000	2001	*2002	*2003	2004
Arrest	8,748	8,446	7,274	7,088	10,141
Exceptional	7,702	7,486	7,593	6,994	7,710
Unknown	4,478	4,756	4,037	3,778	5,162
Total	20,928	20,688	18,904	17,860	23,013

During 2004, 78 percent of all domestic violence cases were cleared, the same as in 2003. A breakdown of the clearances in 2004, were 44 percent by arrest, 34 percent by exceptional and 22 percent unknown, compared to 40 percent by arrest, 39 percent by exceptional and 21 percent unknown in 2003.

* Baltimore Police Department was unable to provide any 2002 and 2003 Domestic Violence statistics to the Maryland Uniform Crime Reporting Program due to data conversion.

INDEX OFFENSE DATA

The tables contained within this section were designed to provide quick reference to statistical crime information relative to the different reporting areas of the State of Maryland.

The tables are broken down by Region. Within each Region information is listed in County name sequence and is further detailed to show the activity experienced by individual police agencies. The general identifying descriptions which indicate the reporting areas are listed and defined as follows:

- | | | |
|------------------------------|---|--|
| Regional Total | - | This line indicates the total activity of all the Counties within the indicated Region. |
| County Total | - | This line indicates the total activity of all reporting Agencies within the indicated County. |
| Sheriff | - | This line indicates the total activity reported by Sheriff's Offices. This includes activity which may have occurred within the corporate limits of towns in that County. |
| County Police Department | - | This line indicates the total activity reported by County Police Departments. This includes activity which may have occurred within the corporate limits of towns in that County. |
| State Police | - | This line indicates the total activity reported by all State Police installations within the indicated reporting area. This includes activity which may have occurred within the corporate limits of towns in that County. |
| Municipal Police Departments | - | This line indicates the total activity reported by the specified police departments and includes only those crimes which were handled by that department. |

There are five regions used in the Maryland Uniform Crime Reporting Program which are listed below.

Region I - Eastern Shore

Caroline County
Cecil County
Dorchester County
Kent County
Queen Anne's County
Somerset County
Talbot County
Wicomico County
Worcester County

Region II - Southern Maryland

Calvert County
Charles County
St. Mary's County

Region III - Western Maryland

Allegany County
Carroll County
Frederick County
Garrett County
Washington County

Region IV - Washington Metropolitan

Montgomery County
Prince George's County

Region V - Baltimore Metropolitan

Anne Arundel County
Baltimore City
Baltimore County
Harford County
Howard County

Crime Rates for the individual agencies are not calculated in the following table because of overlapping jurisdictions in many cities of municipal, county and state law enforcement agencies. This table contains the offenses as reported by the individual agencies with crime rates for the county and region totals. Arson offenses are listed opposite the agency reporting the Arson and are not computed in the total offenses or crime rates.

MARYLAND ARREST DATA

ARREST DATA

The Maryland Uniform Crime Reporting Program requires the submission of monthly reports of persons arrested in the state. A record of arrest activity for both Part I and Part II crimes are received from state, county and municipal law enforcement agencies showing the age, sex and race of persons arrested. Traffic arrests, except Driving While Intoxicated, are not reported. A total of 309,777 arrests for Part I and Part II criminal offenses were reported during 2004. In 2003, there were 324,559 arrests which represents a 5 percent decrease. Based on 2004 population estimates, there were 5,573.5 arrests per 100,000 population in Maryland. The arrest rate for 2003 was 5,891.5 representing a 5 percent arrest rate decrease.

A person is counted on the monthly arrest report each time they are arrested. This means that a person may be arrested several times during a given month and would be counted each time. However, a person is counted only once each time regardless of the number of crimes or charges involved. A juvenile is counted as "arrested" when the circumstances are such that, if the juvenile were an adult, an arrest would have been counted or when police or other official action is taken beyond a mere interview, warning or admonishment.

Arrest figures do not indicate the number of individuals arrested or summoned since, as stated above, one person may be arrested several times during the month. However, arrest information is useful in measuring the extent of law enforcement activities in a given geographic area as well as providing an index for measuring the involvement in criminal acts by the age, sex and race of perpetrators.

During 2004, 16 percent of all reported arrests were for Crime Index Offenses, compared to 15 percent in 2003. Analysis of Crime Index Arrest Data indicates that larceny-theft comprised the highest percentage of all arrests for Crime Index offenses, with 51 percent of the total in 2004, up from 50 percent in 2003. The drug abuse, other assaults, driving under the influence and disorderly conduct categories recorded the highest percentage of arrests for Part II offenses. These offenses accounted for 45 percent of the total arrests for Part II offenses in 2004.

		5 YEAR TREND				
	5 YEAR AVERAGE	2004	2003	2002	2001	2000

Adult	264,718	257,546	273,155	264,722	259,000	269,167
TOTAL	314,514	309,777	324,559	311,891	308,094	318,249

VIOLENT CRIME ARRESTS

Violent Crime arrests for 2004 represented 25 percent of all arrests for Crime Index Offenses and 4 percent of total arrests, the same as in 2003.

A further evaluation indicates that arrests for robbery and aggravated assault represented the highest percentage of the total arrests for violent crimes with 28 and 66 percent, respectively.

PROPERTY CRIME ARRESTS

Property Crime arrests represented 75 percent of all arrests for Crime Index Offenses and 12 percent of the total arrests in 2004, the same as in 2003.

The highest percentage of property crime arrests, 68 percent, continues to occur in the larceny-theft category.

GAMBLING ARREST

A total of 353 gambling arrests were reported during 2004. In 2003, 402 persons were arrested for Gambling violations resulting in a 12 percent decrease.

Arrests for Gambling offenses amounted to less than 1 percent of all reported Part I and Part II arrests in 2004. Persons under the age of 18 made up 13 percent of all Gambling arrests in 2004, compared to 20 percent in 2003.

DRUG ABUSE VIOLATION ARRESTS

Information pertaining to drug abuse violation arrests is collected according to specific drug categories and whether the arrest was for sale or manufacture or possession of a specific drug. During 2004, a total of 51,971 arrests for drug abuse law violations were reported compared to 54,560 drug abuse law violation arrests in 2003, resulting in a 5 percent decrease.

Evaluation of the reported data discloses that 32 percent of all persons arrested for drug abuse violations were under 21 years of age and 16 percent were under 18 years of age in 2004, compared to 32 and 15 percent respectively in 2003.

Analysis of individual categories showed that the highest percentage of arrests, which involved opium or cocaine and derivatives, was 58 percent in 2004 and 60 percent in 2003. Drug abuse arrests, for marijuana was increased to 39 percent in 2004 from 37 percent in 2003. Of the total drug abuse arrests 71 percent were for possession while 29 percent were for sale or manufacture in 2004, compared to 70 and 30 percent respectively in 2003.

Possession of marijuana increased to 35 percent of the total drug abuse arrests in 2004, from 33 percent in 2003. Possession of opium or cocaine and derivatives represented 35 percent of the total drug abuse arrests in 2004, a decrease from 36 percent in 2003. Arrests for sale or manufacture of marijuana amounted to 4 percent of the total drug abuse arrests in 2004. Sale or manufacture of opium or cocaine and derivatives decreased to 23 percent of the total drug abuse arrests in 2004, as compared to 24 percent in 2003.

To aid in the study of drug arrests a chart by county is provided.

ASSAULTED**

LAW ENFORCEMENT OFFICERS KILLED

Three law enforcement officers died in the line of duty in Maryland during 2004. The following summary is based on information provided by their agency and the Federal Bureau of Investigation. The Federal Bureau of Investigation conducts in-depth investigation of these tragic incidents in which law enforcement officers have made the supreme sacrifice in the performance of their duties.

May 2004

A six year veteran of the Maryland State Police died as a result of injuries he received when struck by a drunk driver. The trooper was assisting another trooper at the scene of a motor vehicle accident when he was struck and killed.

July 2005

A 36 year old officer of the Baltimore Police Department died after being shot. The ten year veteran approached two men seeking their identification when the suspects ran. The officer pursued one of the suspects who shot the officer.

July 2005

A ten year veteran of the Maryland Transportation Authority Police died as a result of injuries he received in a motor vehicle accident. The 29 year old officer was sitting in his cruiser after issuing a traffic citation when he was struck from behind by a pickup truck.

LAW ENFORCEMENT OFFICERS ASSAULTED

The following information is based on a detailed monthly collection of data in the Uniform Crime Reporting System regarding the problem of assaults on local, county and state law enforcement officers. The large number of reported assaults on sworn officers is in part due to a prevalent attitude of disrespect for law enforcement in certain elements of our society.

A total of 3,868 law enforcement officers in Maryland were victims of assault in the line of duty during 2004, compared to 3,742 assaults during 2003 resulting in a 3 percent increase.

The rate of assaults on law enforcement officers for the state was 26 assaults per every 100 sworn officers in 2004. In 2003 the rate of assaults on law enforcement officers was 25 assaults per every 100 sworn officers.

Physical force was used in 84 percent of all assaults on police officers.

The greatest number of assaults, 30 percent, occurred while officers were responding to disturbance calls (family disputes, man with a gun, etc.), 30 percent of assaults on police officers occurred between 10:00 P.M. and 2:00 A.M.

A total of 3,711 assaults on law enforcement officers were cleared during 2004 amounting to a 96 percent clearance rate.

LAW ENFORCEMENT EMPLOYEE DATA

POLICE EMPLOYEE DATA

The Uniform Crime Reporting Program in Maryland incorporates the collection of pertinent data relating to the police of the State. Information regarding police employee strength is discussed in this section.

This information is submitted by county, municipal and state law enforcement agencies and compiled on an annual basis. Specific information concerning the number of law enforcement employees reflects the status as of October 31, 2004

LAW ENFORCEMENT EMPLOYEE RATES

In 2004, the average number of full-time law enforcement employees remained unchanged from 2003. Law enforcement employees, (state, county and municipal) including civilian employees, amounted to 3.5 for each 1,000 inhabitants of the state. The rate based on sworn personnel only (excluding civilians), amounted to 2.7 per 1,000 population.

The ratio of law enforcement employees per 1,000 population in any given area or municipality is influenced by a number of factors, much the same as the crime rate. The determination of law enforcement strength for a given county or municipality is based on factors such as population density, size and character of the community, geographic location, proximity to metropolitan areas and other conditions which exist in the area generating the need for law enforcement services. Employee rates also differ among agencies since, in particular, there is a wide variation of the responsibilities and level of activity within various law enforcement agencies. The information in this section relates to reported police employee strength and should not be interpreted as recommended strength for any area.

CIVILIAN EMPLOYEES

The personnel of each law enforcement agency differ as to the demands and responsibilities placed before them. Many police officers are fully occupied with clerical tasks and are not free to perform active police duties. Some police administrators use civilians in this capacity, thus freeing the sworn personnel for actual police related services.

As of October 31, 2004, 4,586 or 24 percent of the total number of police employees in Maryland were civilians.
