

1 Circuit Court jurisdiction, original jurisdiction, and
2 then you are setting up another court next to it and
3 saying half of it is going to go over here. This means
4 that you are going to have two sets of courts, two sets
5 of clerical offices and all the attendant difficulties
6 with those. It seems to me that if my assumption is
7 correct, one, that the clerks' offices will be under the
8 supervision and control of the courts in the new plan,
9 and two, that they will be modernized, then those offices
10 ought to handle all the paper work for the People's Court.
11 We are living in an age where the more paper work you
12 have, the more efficiently you can handle it. I think
13 this ought to apply, too. The more paper work, the more
14 e fficiently you can handle it. For instance, the court
15 has just adopted a rule to use mail service. People's
16 Court has been using this for 25 years. I can envision
17 where 80 or 90 per cent of service in future cases will
18 be by mail. It would seem ridiculous to have two offices
19 doing the same job, separated a couple of blocks apart.

20 MR. MARTINEAU: It is not precluded that this
21 could all be done by the same staff of people.
