

(iii) The maximum population that could be served by each sewer construction item as the item is proposed to be designed;

(iv) The maximum area limits that could be served by gravity systems for each sewerage system construction item and the area that each item is designed to serve, with the area limits set forth in a general narrative statement and on a map;

(v) The demonstrated need for each major project, including a presentation of appropriate facts justifying the proposed construction; and

(vi) The estimated cost of each construction item in the program.

7-105.

[(c) (1) In Prince George's County, if surface water or storm drainage facilities are included in the WSSC Capital Improvements Program, Prince George's County shall advertise in at least 2 newspapers published in the County.

(2) The advertisement shall include:

(i) Notice that the WSSC has proposed the construction of a surface water or storm drainage system;

(ii) The approximate cost and general location of the proposed system;

(iii) Notice that interested parties may be heard at a public hearing on the proposed system; and

(iv) Notice of the time and place of the hearing.

(3) The WSSC shall be prepared to exhibit a plan for surface water or storm drainage facilities at the hearing. The exhibit shall include information about the length and size of pipe and the approximate cost of the pipe.]

7-106.

(f) (1) Unless the County Councils have approved the extension, the WSSC:

(i) May not extend or approve construction of a sewer of any size or capacity to serve property in either county beyond the area which has been approved for service in a WSSC Capital Improvements Program and the 10 year water and sewer plan; or
