

Subsection (c) of this section is new language derived without substantive change from the second clause of former Art. 56, § 333(c) and, as it related to certificates of registration, the fourth sentence of former Art. 56, § 338(a).

Subsection (d) of this section is new language derived without substantive change from the second sentence of former Art. 56, § 341(f), except as that sentence related to a revoked license.

In subsection (c)(2) of this section, the word "registration" is substituted for the former word "serial", for clarity.

Former Art. 56, § 335(j), which made an individual eligible for a license "although he may not be practicing his profession at the time of making his application", is deleted as misleading. The central theme of this title is that an individual must be licensed to practice land surveying or property line surveying. Former § 335(j) implied just the opposite -- i.e., an individual already should have been practicing when the individual applies for a license.

As to the restrictions on the issuance of property line surveyor licenses, see § 15-302 of this subtitle.

Defined terms: "Board" § 15-101
