Several letters have recently appeared in the New York Statemen from a traveller

the New York Statesman from a traveller on his reputs from Albany, by way of the Eric chail, to Priagera. One of his letters furbhies the following ancedotes:—
iThe sanal boat had got so far under way, as to compel us to run to a bridge above, and lesp agont the deck—an expedient often renarted to by paisengers, who remained a moment too long on above. Sematimes they happen to drop in, but the water is not deep enough to drown the water is not deep enough to drown them; and like Palinurus, they only make aport for the rest of the crew—A curious accident efthis kind, happened last summer. A lady passenger fell overboard, from the bow, carrying the steps with her. The Captain had the gallantry to leap in, to rescue the unfortunate fair, and the boat went over both. As soon as it bed pas-sed, they rose to the surface, and the cap-tain seized his charge. She shook the mud and water from her head, and immedistely burst into a fit of laughter, at the figure which herself, the Captain, and hall a dozen other passengers, who had jumped overhoard to her assistance, made white

wallowing in the bed of the Caust.

"An anecdote was told us of a Frenchman, which served to amuse a dull mile of our passage, if indeed such a mile has been met. He was sitting reading, with his face to the stern, and his elbow projecting from one of the cabin, windows, at the helm seeing Monsieur's arm exposed, just as the boat was approaching a bridge exclaimed by way of warning, solook oring exclaimed by way of warning, who out!" The Pernehman construing the phrase literally and supporting his attention was directed to one of the ten thousand interesting objects along the cannot popped his head out of the window, instead of drawing his arm in—and the convequence was, a severe, though not dangerous human against a nost to he sayravarous, bump against a post, to his aggravation, but to the no small diversion of the steersman in a fit of passion, and they had a long dispute, whether the phrase look

NOTHER SLANDER CASE

nder case was tried at the district bf Quachita, Louisiana, on the 19th Dr Hamlin, member of the Le, versus General Hughes. The Tange of defence was allowed the and many witnesses were examined Thetrial lasted 12 nours, and a verdict was given or 11,000 dollars for the plaintiff. Soon after the jindgment of court for 11,000 dollars was recorded, Dr. Ham lin, the plaintiff, came into the court and voluntarily recorded satisfaction for the amount, without having received any part wit, observing chat he did not sue because he wanted Gen. Highes' money, but to protect an injurid reputation; that object having been obtained by the verdict of the jury, he would relevise none of the money. It is strange that people will indulge the manelyes in the abase of others. One would think that man possessing even

would think that a man possessing even a small share of sensibility, would feel de-graded and mortified at being sued for calumniating another. Being thus seed cer-tainly creates a general suspicion of his word, and if he fail to prove what he has charged on the person suing him, it brings an indelible blot upor his own character.

HONESTY HONOURABLY REWARDED.

It will be recollected that on Tuesday last, Col. Trambull advertised in the New York Gazette, the loss of a 500 dollar bank bill. The bill was found by Mr. Gordon Dennie, a clerk in the City Bank, and promptly returned to the Colonel by the finder, who refused to tale any reward. Yesterday, Mr. Dennis received the following note, accompanied by a silver cup, from Col. Trambull:

steam-engine on his premises, and a con siderable portion of superfluous steam, has conceived the idea of growing Pine apples by n cans of this superfluity. The steam s introduced under the roo's of the plant, and the warmth and moisture operate so powerfully upon it, that it soon arrives at maturity; whilst the body of the plant, being freely exposed during the day to the open air, acquires a figuress and healthiness, which contribute powerfully towards the fine flavour of the truit, and render if superior to that which is produced in close hot houses. MIRACLE. BY DR. H. A. KRUMMACHER.

Translated from the German, by Shobore.
One day in spring, So omon, then a
youth, sat under a paim tree, in the garden of the king, his father, with his eyes fixed on the ground, and absorbed in thought. Nathan, his preceptor, went up to him, and said. Why sittest thou thus, musing under the palm trees? The youth raised his head, and answered, Nathan, I am exceedingly desirous to behold a miracle. A wish, said the prophet, with a smile, which I entertained myself in my juvenile than, came to me, bringing in his hand a pomegranate seed. Observe, said he, what this seed will turn to. Hetherenpon made with his finger a hole in the earth, and put the seed into the hote, and covered it.— Scarcely had he drawn back his hand, when the earth parted, and I saw two small leaves shoot forth; but no sooner had I perceived them than the leaves separated and from between them arose a round stem covered with bark, and the stem became every moment higher and thicker. The man of God thereupon said to me, Take notice! and while I observed, seven shoots issued from the stem, like unto the sever tioned to me, ar d commanded me to be silent and attend. Behold new creations will soon make their appearance. He thereupon brought water in the hollow of his hand from the stream which flowed with green leaves, so that a cooling shade was thrown around us, together with a de licious odour. Whence exclaimed I is this perfume and the refreshing shader Seest thou not, said the man of God, sear-let blossoms, as shooting forth from serong the green leaves, it hangs down in clusterwas about to answer, when a gentle breeze avitated the leaves, and strewed the blos soms around us, as the autumnal blast scatters the withered foliage. No sooner had the blossoms fallen than the red pomegranates appeared suspended among the feaves, like the almonds on the stayes of Aaron.—The man of God then left me in profound amazement. FROM GREECE

From the Boston Repedery. We published, a short time since, a letter from Mr. Miller, who is in Greece, and another from Prince Mayrocordatos, datel in December last. A letter has since her received by the Greek committee in us town, from Miller, dated the 14th of Jans-ary, in which he gives some information deserving of attention, of the state of alfairs in Greece. He says, that amidst tas general distress, equal to what any people ever endured, it is the universal declaraon of men, women and children, withis under the power of the Turks-that they have a general aversion to the Branks, pean powers—and that the Greek govers-ment is daily gaining strength, and there is a tair prospect of a speedy tetthement of internal dissentions. Mr. Miller waspre, sent at a congress of the principal inhab-tants and generals from the departments of Western Greece, which was held at Anto-Western Greece, which was held at Ando-lico, December 16, and sat tee days. The proceedings were conducted with much order and regularity, and all the affairs of Western Greece were amicably discussed and settled, though the officers and soldiers who have defended the tountry for the last six months have received heither rations, clothes nor money. There were 2000 soldiers in the town, who came with their life. different commanders, yet there was nor Miller expected to march on the next day a volunteer under Col Jacris, in an expedition against Lepanto. Patras was to be attacked at the same time by troop from Napoli. He repeats his adject that no American should, embark in the Greek no American should embark in the Greek cause, unless they have resource to pre-vide the means of support. Hendreds of adventurers, he says, have already perita-ed in Greece, and have done little or no-thing for the critics of liberty or Greek.
