TRICK OF A GERMAN STU-DENT.

ROLF, having no remittance from home, and being in want of a good dinner sauntered about the market place of the town in which he resided. The busy throng had dispersed. 'A few stragglers only remained, who with hungy ever were viewing the with hungry eyes, were viewing the templing morsels. A sudden thought struck Rolf.—He boldly advanced, and, taking one of the people aside, whispered to him that he was sent at that quiet hour by the celebrated Dr. Addlebrain, to purchase the tail and the two hind houss of an ox, as that learned physician had discovered, that, by calcining these substances with the back bone of an ass, he might obtain a powder which would be an in-fallible cure for the gout, palsy, pestilence—in short a complete panacea.
Before taking out a patent for this
wonderful discovery, the doctor wished to make a final experiment, and for that purpose had sent him to purchase the necessary articles. As the butcher was well aware that a gout-extirpating powder would be in great demand, he was overjoyed at the news, and han dled the before-despised hoofs as if they were shod with gold and studded with nails of silver. He lugged out the whole assortment of tails, and en-

treated Rolf to take his choice With a countenance of immoveable gravity, Rolf examined and criticised them, and at length chose one of a jet tilack hue, with hoofs to suit. "The rejected tails were laid carefully aside; Bolf's offered payment was declined; and the butcher, slipping a dollar into his hand, begged his interest with Dr. Addlebrain. Rolf gave him a patronising nody and, having packed his pirchase, he took it up, drew his cloak over it, and walked deliberately away. still heard in the inm of the Golden Ragle, when Rolf knocked loudly at fore the youth, and ushering him into a handsome apartment, offered to dis-encumber him of his cloak. The moment, however, he was aware of the transaction, he gave the matter of the transaction, he gave the wait such a hearty cuff, as sent him reeling to the other side, of the room, and a single stamp of his foot cleared it of all intruders. Having fastened the door, he induled the steep himself in an extravagant fit of laughter. Rolf then went to bed, and slept soundly till a late hour, when he arose and equipped himself for the second act of the farce. Having unfastened the door, he jumped again into bed; and rang the bell violently. When a servant entered the room, Rolf threw one leg out, of bed, and called out, breakfast. "Talk not of heels!" ejaculated the servant; "I say he has hoofs!" "Who has hoofs, blockhead!" demanded the enraged landlady. "Hast thou been at the borlandlady. .. "Dol! fool! you shall be well punished for this freak. Go up instantly," she bawled to another servant, "and ask what the gentleman wants.". The man obeyed, but by this time Rolf had both legs hanging out of wants. I he man one-year out of time. Rolf had both legs hanging out of the bed, and his dog grawled from beneath it. CURE FOR DRUNKENNESS. It is said that the remedy for drun-It is said that the remedy for turun-kenness, employed by Dr. Chambers, of this city, is becoming quite popular; that applications for the precriptions are very frequent, and that some very surprising cures have been effected. The Editor of the New York Observer has made a careful investigation of the merits of the autidate, in conjunction manner he may be cured of his vice by indulging in it; and grow intemperate by gratifying his propensity to temperance. One of the most remarkable instances of a cure effected by the means of this remedy, is that of a young man who was a drunkard from his childhood—"educated" as such by his father, drinking a quest of said his father, drinking a quart of spirits a day, and setting up at night to tipple; who had often slept away the fumes of his intoxication in the watch house, had been twice a lunatic, and had several times fallen down in fits. Several weeks ago he took the medi-cine and has drank no spirits since. Whether the cure effected by this means be permanent or not, cannot yet be told, none of the cases having ! of more than two months standing. At all events in case of a relapse a secoud dose might be administered.

Dr. Prideaux used to retate that when he brought the copy of his "connection of the old and new testament," to the bookseller, he told him it was a dry subject, and the printing could not be safely woutured amountainess he could enlive a the work with a little hu-
