The Speaker and the lower House of Assembly desire to be present at this Meeting who are accordingly admitted.

The chief Indian Utesite, by an interpreter, addressed himself to the Governor as follows:

Brother: I have had good Dreams, this is the Day that was appointed for our Meeting; I am glad to see so many Gentlemen present to hear what I have to say; I hope that you also have had good Dreams, and are pleased to see us here.

King George owns us for his Children as well as the white People; he desires that we should be as Brothers, and that we should stand by one another. We have no other Design in coming hither at this time than to assist our Brothers the English.

Some of our young Warriors came to you last Spring and met with Encouragement they had Rewards given them, and were well satisfied. After they returned I was sent for by old Wipow Chief, where I went to him he bid me go and see the Gov. his Brother, that had put him the Bell, and assured me that I should find him a good Friend to us.

Our young Men would readily come hither to fight and assist the English if they could get wherewithal to maintain their Wives and Children; while they stay at Home they can maintain them by hunting, and we indeed had no Occasion to come from Home, for the War is not ours but yours; the Rewards that we may have for our Services are not so much as we could have got by Hunting, but if we can get near as much by coming to fight for our Brothers as we could by staying at Home we would rather come and assist them.

We have been here some Time but have hitherto done little Service the Badness of the Weather hath prevented our going out lately to look after the Enemy.

We did not know before last Spring that we should go out to them, nor did we know even then whether we were to go, but now we have discovered the Enemy's Country we shall come in great Numbers and cut them off.
