PLAIN FACTS
WORTH
READING.

A large, well established and successful business, with an experience of more than twenty-five years, enable us to offer inducements to all who are about to become purchasers of

☞*Clothing*☜

second to no establishment in the country. Our garments are all made of the best materials, carefully selected; nothing unsound or in any way imperfect is made up at all, even in the lowest grades of goods. It is a well established fact among clothiers, that our Ready-Made Clothing, in every thing that goes to make a superior garment, is unequalled by any stock of goods in Philadelphia.

Our assortment is so large and varied that every one can be fitted at once, without delay. Our prices are always guaranteed as low, or lower, than the lowest elsewhere. We have also a fine assortment of

☞*Goods in the Piece,*☜

which will be made up to order, in the best manner, and at prices much lower than are usually charged for garments made to order.

Samples of goods, with price lists for all kinds of garments, forwarded by mail at any time when requested, with instructions for self-measurement, and garments, either made to order or selected from our Ready-Made Stock, forwarded by express, guaranteed to fit correctly.

Persons not residing here, can when visiting Philadelphia, call and have their measure registered on our books kept for that purpose, from which garments can be ordered at any future time.

FARM AND HOUSEHOLD.

☞To any who will contribute an occasional article to this column—once a month or oftener if so inclined—we will send a copy of *The Whig* free.

Valuable Books for Farmers and Stock Breeders.

N. P. Boyer & Co., Parkesburg, Chester county, Pa., have issued five pamphlets, which contain many valuable hints and much useful instruction for those who raise stock. The price is 25 cents each. We have made arrangements to send one of these manuals *free* to each of our new subscribers or old ones, who renew and pay in advance.

"THE HORSEMAN'S MANUAL," teaches you how to breed, break and doctor horses, and gives much other valuable information important to horse owners.

"THE DAIRYMAN'S MANUAL" is a valuable treatise on cows and their products, and is filled with useful information for those in the dairy business or those who contemplate starting in this business.

"THE SHEEP AND GOAT BREEDER'S MANUAL" contains all the information necessary to become a successful breeder of these valuable animals, and gives a description of the sheep of different breeds, and also of the Cashmere or Angora Goat, with the directions for rearing, &c.

"THE HOG BREEDER'S MANUAL" is a valuable compilation of facts for the raising and fattening of this much abused quadruped, and if the suggestions are followed will enable the reader to make this branch of farm industry profitable.

"THE POULTRY BREEDER'S MANUAL," gives a description of the various breeds of fowls, their good points, how to raise them, the diseases to which they are subject, and how to treat them. Also chapters on Pigeons, Rabbits, Dogs and Birds.

Messrs. N. P. Boyer & Co., are publishers of "THE AMERICAN STOCK JOURNAL," and among the largest and most successful importers and breeders of choice Blooded Stock in this country, which gives these little pamphlets a reliability they would not otherwise possess.

Draining Land.

[From "Walks and Talks on the Farm," in *American Agriculturist.*]

There are very few people who know how to drain low land where there is apparently little fall, and yet it is one of the simplest things in the world. In cleaning out an old creek or natural ditch, we must of course commence at the lowest point and work up stream. Then dig deep enough to leave the water on a dead level. In digging open ditches from the main stream up into the land adjacent, commence at the main stream, and work up through the lowest parts of the land and *dig deep enough to make the water follow you from the stream up into the land.* In this way you are sure of losing no fall. When properly done there will be no shoveling of loose earth. Let the spade be thrust down an inch or two below the level of the water in the completed ditch, and the few crumbs of earth that fall from the spade will settle to the bottom of the ditch in the water, and do no harm. "But you are making the water run the wrong way. We want to get the water out of the land, not to bring the water from the stream up into the land." True, but wait until the next rain comes, and then you will see the water run *down* this ditch with a rapidity that will astonish you. The bottom of the ditch is on a dead level, but as soon as the rain raises the water at the upper end it will begin to flow down the stream and will not stop as long as there is any water on the land. I have dug a good many ditches in this way, and am sure that it is not only the best but the cheapest method. No matter how dry the land is, you have always water to level by and need never go an inch deeper than is necessary, nor ever feel uncertain whether you are deep enough. There is no after shoveling. You get all the fall there is, and when the work is finished there is nothing more to be done. A great deal of ditching is done on low land that is comparatively useless from neglecting to observe this simple rule.

In the Stables.

Stock in the stable must be looked after. It is there confined and can procure nothing but that which is laid before it. This is an unnatural position, for nature would prompt it to range the fields, glens and meadows, selecting its own food, drink, and resting places, its own rubbing posts, shades and shelters. But, being civilized and under the care of civilized man; its naturally wild habits are changed for those of civilization; it is in a manner dependent on its owner to supply its wants; and if the owner understands his own interest he will duly study and supply them.

Food must be supplied regularly and at regular intervals; it must be in sufficient quantity and that only—none to waste; it must be pure and healthy—not damaged by mould or otherwise; it must be properly prepared by cutting, cooking &c., it must be fed in a manger, tub or bucket—not on the bare ground to be dirtied and wasted.

Drink of pure clean water must be offered at least three times a day, in sufficient quantity, in a clean trough, tub or bucket. The animal's skin must be kept clean by currying, brushing and rubbing. It must have a clean place to stand and lie down on; it should have exercise in the open air every day that is not stormy. The stable should have a good roof and be well ventilated. Give a little salt twice a week.

Treat kindly and don't swear—animals hate swearing and swearers.

TO COOK A CHICKEN.—There are many good ways of cooking chickens. This is the last one I have learned, and very good. It is an easy way. Put a spoonful of butte in the bottom of a frying pan, lay in the pieces, cover it, and set it in the oven. Turn the pieces several times while cooking. When done, take out the chicken, turn off nearly all of the fat if there is much of it, and make a gravy of the remainder by adding a teacup of water; thicken, when boiling, with a thin paste of flour and water.

I doubt if this is quite as wholesome as the common *chicken-stew.* Put the pieces in a kettle with water enough to cover all. Let it come to a boil rather slowly and simmer gently until very tender, adding boiling water whenever any is needed to prevent burning. Before it is quite done salt the whole. Take up the pieces, when very tender, and make a gravy of the broth by thickening it and adding a little sweet cream. This broth shoul I always be skimmed when it first begins to boil, and all the fat floating upon the surface should be removed with a spoon before it is salted. Chicken fat is not very palatable, and when it is "tried," it makes a good oil for many domestic uses. R

KEEP THE SMALL POTATOES UNTIL SPRING.—Farmers frequently feed their small potatoes to fattening pigs in the fall. It would be much better to keep them until Spring, and then cook them, mix them with a little meal an feed them to suckling sows and young pigs. In the Spring, before the cover is ready to turn into, we are generally short of succulent food, whereas in the Autumn we have apples, pumpkins, cabbage leaves, and a variety of vegetables that will not keep until Spring. The value of potatoes as food for stock does not lie so much in the mere nutriment they contain as in their giving tone to the stomach; and they will prove much more useful when fed to fattening pigs in the Fall.

☞A good story is told of a rather verdant agricultural laborer, who having by hook and by crook scraped together fifty dollars, took it to his employer, with a request to take charge of it for him. A year after, the laborer went to another friend to know what would be the interest on it. He was told three dollars. "Well," said he, "I wish you would lend me three dollars for a day or two. My boss has been keeping fifty dollars for me a year, and I want to pay him the interest for it.

HOW THEY WASH.—In the way of getting up linen and other dainty fabrics, the 72 nd none who can beat the Dutch.—In their own country they use no machines—borax is the magic word. This article, refined, is liberally employed as a powder in place of soda, in the proportion of a large handful to about ten gallons of boiling water—cambrics and laces requiring a somewhat stronger solution. In addition to other advantages, a saving of one half the soap is thus secured.

HOT HAM SANDWICHES.—Make a batter of flour, eggs and milk, and pour some into a frying pan of hot fat, as for pancakes; let it be very thin, and when it has fried for a minute or two, lay very thin slices of cold boiled ham on it, and cover them again with some more batter; when brown on the other side, cut it into quarters and turn them to brown on the other side.

The Great Medical Discovery!
DR. WALKER'S CALIFORNIA
VINEGAR BITTERS,

Hundreds of Thousands
Bear testimony to their wonderful Curative Effects.

WHAT ARE THEY?

THEY ARE NOT A VILE

FANCY DRINK,

Made of Poor Rum, Whiskey, Proof Spirits, and Refuse Liquors, doctored, spiced, and sweetened to please the taste, as called "Tonics" or "Appetizers," or "Restorers," &c., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the Native Roots and Herbs of California, **free from all Alcoholic Stimulants.** They are the GREAT BLOOD PURIFIER and LIFE GIVING PRINCIPLE, a perfect Renovator and Invigorator of the system, carrying off all poisonous matter, and restoring the blood to a healthy condition. No person can take these Bitters, according to Directions, and remain long unwell.

$1400 will be given for an incurable case, provided the bones are not destroyed by mineral poisons or other means, and the vital organs are not wasted beyond the point of repair.

For Inflammatory and Chronic Rheumatism, and Gout, Dyspepsia, or Indigestion, Bilious, Remittent, and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys, and Bladder, these Bitters have been most successful. Such Diseases are caused by Vitiated Blood, which is generally produced by derangement of the Digestive Organs.

They invigorate the stomach, and stimulate the torpid liver and bowels, which restore them to healthy action. In cleansing the blood of all impurities, and imparting new life and vigor to the whole system.

For Diseases of Indigestion, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Copious Discharges of Urine, Pain in the region of the Kidneys, and a hundred other painful symptoms which are the offsprings of Dyspepsia, are cured by these Bitters.

Clean the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when it is foul, and your feelings will tell you when. Keep the blood pure and the health of the system will follow.

PIN, TAPE, and other WORMS, lurking in the system of so many thousands, are effectually destroyed and removed.

For full directions, read carefully the circular around each bottle, printed in four languages—English, German, French, and Spanish.

THE CECIL WHIG SUPPLEMENT.

SATURDAY, NOVEMBER 19, 1870.

The River of Speech.

There flows a river through the earth—
From hills of heaven it hath its birth;
Through all the lands that speech hath gone,
For men to float their thoughts upon.

Some send rich fleet of myrrh and gold,
Ships argosied with genius untold,
And though the men upon the shore
Bind them upon the shores, they
Like prophet's oil, grows more and more,
